If you have a 2 piece toilet that was made before 1998, we can safely say that our Standard 2" Dual Flush Kit will work just fine on your toilet.

If you have a 2 piece toilet that is built after 1998, then about 80% of the toilets on the market will still use a Standard 2" Dual Flush Kit. Most others will use the 3" Dual Flush kit. Yes we sell the 3 inch Dual Flush Toilet Kit by special request. If you aren't sure which size you have, a quick look down inside the tank will tell you what you need to know. If you are still not sure, send us an email [info@conservfirst.com](mailto:info@conservfirst.com). You must attach a digital picture looking down into your toilet tank with a ruler in plain site. We will do the best we can to assist you. A Dual Flush Toilet Kit will give you the same benefits as an expensive dual flush toilet and allow you to keep your existing toilet!
